

MISSISSIPPI FLOOD CURB TAKEN UP BY CONGRESS

Army Engineers Submit Plan to Halt Devastating Rampages of "Father of Waters"

BY MARVIN MURPHY

A heavy rain falls in Western Maryland. Minnesota's snows melt and run away. Towns in the Dakotas, Nebraska, Iowa and other States install improved drainage systems. A Michigan farmer clears a wooded area to make way for crops. These things are unimportant in the country as a whole. The floods rage greater and larger as the Mississippi increases the run-off of its waters. Levees were built higher and higher to contain the floods to get them out into the Gulf of Mexico which majestically takes its course down the valley to the Gulf. At times when heavy rains fall in the vast area drained by the Mississippi all the water that has run into the basin comes into the Gulf. At such times the "Father of Waters" is a monster that destroys what it touches.

The levees now, the engineers say, are about as high as they can be built. No more water can be forced through the narrow channel which they make. Some other means must be taken to let the water out into the Gulf. At such times large floods must be adopted.

Congress, through the Flood Control Committee of the House, now has a bill which will make these means possible and forever prevent the recurrence of such catastrophes as the flood of 1927 which cost some \$200,000,000 in property damage.

The committee has before it a plan which provides for three great floodways and a controlled spillway to divert the surplus water from the basin. Until now, the policy has been levees only, with, under recent law, the Federal government paying two-thirds of the construction cost and the states and local authorities one-third. Since the government stepped in, \$240,000,000 has been spent by it and the local authorities in building those thousands of miles of levees.

Floodways and spillways mark a departure in the long defense that has been raised against the Mississippi. Until now, the policy has been levees only, with, under recent law, the Federal government paying two-thirds of the construction cost and the states and local authorities one-third. Since the government stepped in, \$240,000,000 has been spent by it and the local authorities in building those thousands of miles of levees.

After six months of intensive study by thousands of men with levee boards and other organizations co-operating, Maj.-Gen. George J. V. Lomax, who submitted a plan which he said, will take care of any flood of the maximum predicted by meteorologists and flood experts as ever occurred in the basin. It is capable of modification or expansion, he said, to accommodate an increasing population and its property.

CONTROL PLAN OUTLINED

The plan, as has been indicated, contemplates the construction of three floodways and a controlled spillway to divert the surplus water from the basin. Until now, the policy has been levees only, with, under recent law, the Federal government paying two-thirds of the construction cost and the states and local authorities one-third. Since the government stepped in, \$240,000,000 has been spent by it and the local authorities in building those thousands of miles of levees.

The smaller of these floodways would run on the west side of the Mississippi between Cairo and the confluence of the Mississippi and Ohio rivers, south to New Madrid, a section in which the river is now checked suddenly in times of flood. The plan calls for a new line of levees about five miles lower than the old, and build a new line of levees about five miles in the rear. This would provide in the state of Missouri a stretch of land about 100 miles long, fifteen to twenty miles long, rimmed on either side by a levee through which excess water would flow whenever the Mississippi floods reached the low level. The plan also provides for their way to a back-water section near New Madrid.

This floodway, the engineers estimate, would be flooded on an average of once in ten years. In flood years it could be used under cultivation and crops could be harvested on an average of nine seasons out of ten.

The second floodway would run down the Boeuf River basin (a part of the Yazoo basin) on the west side of the Mississippi, from Cypress Creek near the mouth of the Arkansas River to a large backwater north of the mouth of the Mississippi and Red Rivers. This floodway, ten miles wide and eighty or ninety miles long, would be constructed by lining the river with a series of levees, each hill to make levees unnecessary. Half the floodway would lie in Southern Arkansas and half in Northern Louisiana. The engineers estimate that it would be flooded on an average of one year out of twelve, about 60 per cent of it in swamp and timber land.

At the northern end of the basin the western levees would be carried parallel to the Arkansas River as far up as Pine Bluff to the land within the floodway lies against any flood up to the magnitude of that of 1927. This would break the floodway somewhere between that of 1922 and that of 1927 would break the floodway along the Arkansas, turning the excess water down the floodway to the western end of the basin, the mouth of the Red River, where part of it would be retained until the Mississippi falls while the balance would find an outlet through the third and most southern floodway.

This third floodway would run through the Atchafalaya Basin in Louisiana from the Bayou des Glaises to the Gulf of Mexico. Back levees would be built on both sides of the Atchafalaya Basin for a major part of its length to incise the floodway, and other levees would be built to protect the productivity of such parts of the floodway as are not already swamp lands. The engineers estimate that it would be flooded on an average of once in fifteen years, however, the engineers estimate the entire floodway, averaging some ten miles wide and 150 miles long, including three areas, would be flooded.

Along the northern end of this floodway, too, there would be levees, known as "fuse plugs." The levees would be built across the main stream which parallels the floodway will be increased in height varying from three feet to zero, but the "fuse plugs" will be kept relatively weak so that they will be broken and the excess water can pour down the floodway.

The mere use of comb and brush, three or four times a day is not sufficient attention to pay to one of nature's most wonderful gifts, says Prof. John H. Austin, Bacteriologist, hair and scalp specialist, who has associated with The Owl Drug Co. for 17 years.

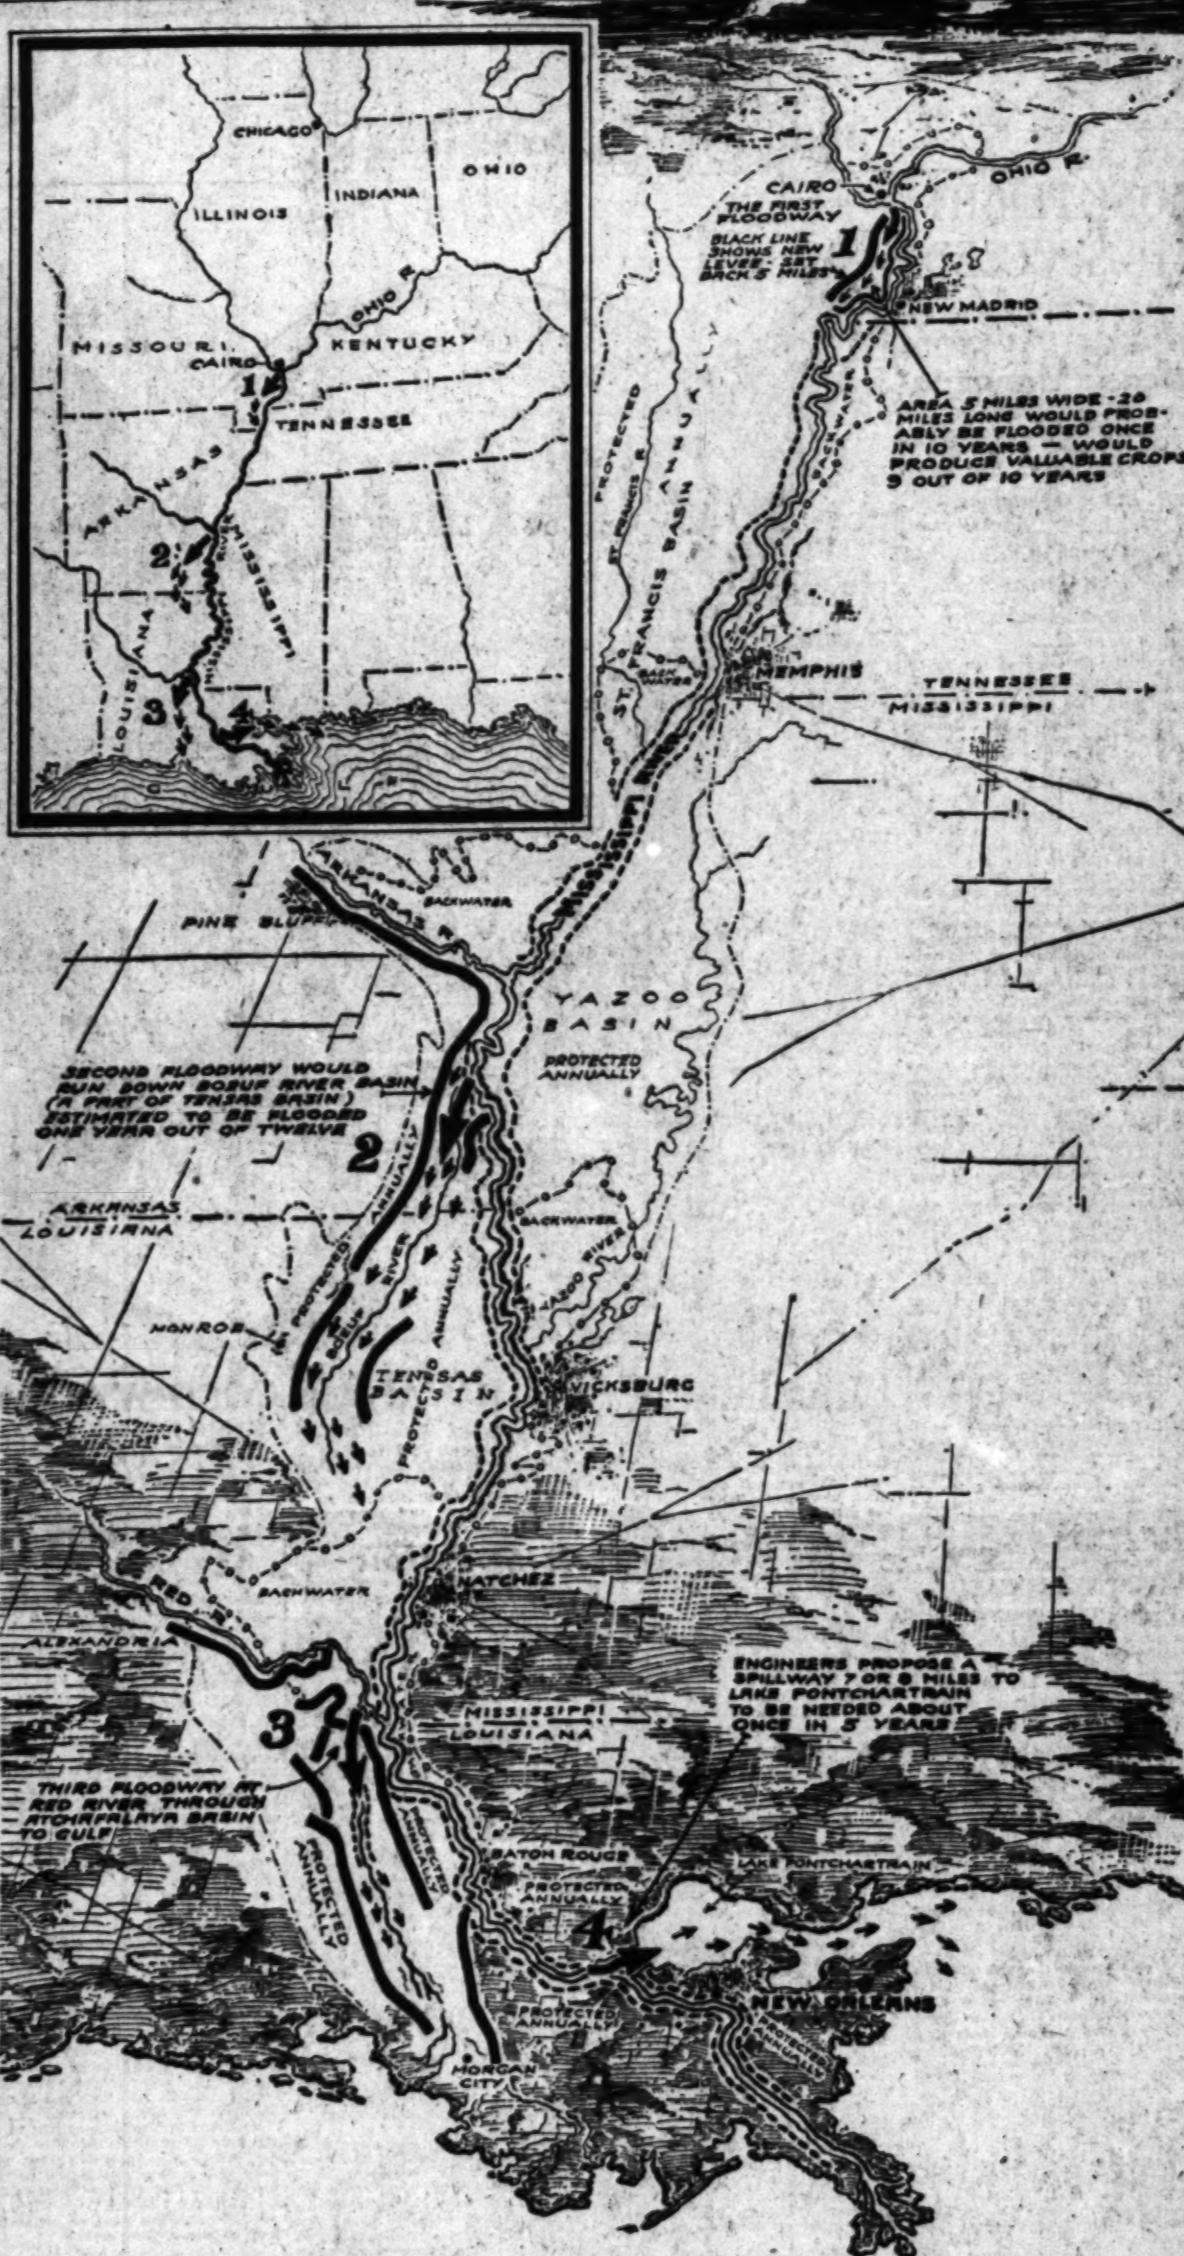

Both men and women owe it to themselves to keep their hair healthy, beautiful and abundant, and the proper corrective treatment of scalp disorders will do this.

Nature's signs of distress—dandruff, itchy scalp, falling hair, oily hair, dry or brittle hair—tell you something is amiss. See Prof. Austin over forty years a Bacteriologist, hair and scalp specialist. He will advise you what to do to free your scalp of hair.

Prof. Austin says the use of manzine cures, hot oils, dandruff cures, hair tonics, etc., without proper advice, is like taking medicine without knowing what you are trying to cure. You may injure your scalp and hair.

FREE MICROSCOPIC EXAMINATION of the hair and scalp both men and women invited. Prof. Austin's office hours 10 to 12 and 2 to 4. The Owl Drug Co. Fifth and Broadway.—[Advertisement].

Floodways and Spillways to Combat Periodic Menace

High Waters to Be Diverted From Heavily Settled Areas

Times Staff Artist Charles H. Owen graphically shows how Army engineers plan to combat the flood peril of the Mississippi River and relieve the pressure on existing levees by diverting much of the surplus flood waters into a series of floodways and spillways. No. 1 shows the five-mile setback of the levees between Cairo and New Madrid. No. 2 is the Boeuf River basin floodway. No. 3 is the Atchafalaya basin floodway and No. 4 spillway from Bonnet Carré above New Orleans into Lake Pontchartrain. Insert shows outline of projects to States in Mississippi Valley basin.

strength is calculated to withstand 400,000 and channel stabilization and mapping \$110,000,000.

President Coolidge has suggested to Congress that the Federal government may be authorized to construct and map, a continuation of present Federal functions, and that the government pay 50 per cent of the flood control cost while the states pay 50 per cent, and in addition, furnish the right of way and assume all responsibility for damages. The river levees around Baton Rouge, City, dimensions of which would be paid for 50 per cent by the government and 50 per cent by local authorities. Under this arrangement the United States would provide the technical advice and interests, the right of way and damages.

Along with the construction of these works, the engineers would modify the levee system of the Mississippi River east seven to eight miles to Lake Pontchartrain. The spillway would so designed as to afford complete control of the discharge. The discharge would begin when the flood stage has reached twenty on the Carrollton gauge and would be cut off as soon as the stage had fallen below the 100-foot mark.

For records indicate that no operation would be required about once in five years.

With the construction of these works, the engineers would modify the levee system of the Mississippi River east seven to eight miles to Lake Pontchartrain. The portion of flood-control costs, exclusive of right-of-way and damages, would be paid for 50 per cent by the government and 50 per cent by local authorities. Under this arrangement the United States would provide the technical advice and interests, the right of way and damages.

How much these rights or way will cost has as yet not been determined. The cost will be based on substantial figures. Neither has it been made clear whether the States would purchase the land outright, or if the Federal assumption of the costs, it may be that Congress will not accept the advice of President Coolidge as to the financial set-up.

The area in the alluvial valley would be flooded by lake water if there were no protecting works. The portion of flood-control costs, exclusive of right-of-way and damages, would be paid for 50 per cent by the government and 50 per cent by local authorities. Under this arrangement the United States would provide the technical advice and interests, the right of way and damages.

President Coolidge took Columbus known as "Junction del Muerto," "Junction of Death" so-called by the early Spanish conquistadores because of the dangers from both thirst and Indians encountered in crossing it.

Archaeologists believe that at some remote period communal houses rose to a height of two or more stories and the site marked today only by low mounds and adobe walls level with the surface of the ground. Broken pottery, arrow points, stone hammers, shell beads, bits of turquoise and other artifacts left by the ancient inhabitants have been found over a mile in extent, they have

discovered.

Bonnet Carré is a tiny village in the heart of the Mississippi River delta.

It contains the shadow of Mount Etna which has been extinct for four or

five hundred years. The village is about 4000 feet above sea level and is not far from David, capital of the province.

HOPE LIVES AFTER PAIR

Lawyer Makes Futile Effort to Save Mrs. Snyder
Restoring Life With Injection

NEW YORK, Jan. 14. (Exclusive)—A wild and bizarre effort to save the life of Mrs. Ruth Brown Snyder, even after she had died, was revealed yesterday by Joseph Lomax, one of her last visitors, who hoped to obtain possession of the body to remove it to his home in New Jersey, according to Leonard, who served as legal counsel to the Warden. Lomax, commanding him not to permit anyone to touch the body, said: "I signed a paper to that effect."

This was signed by Mrs. Josephine Brown, the mother of Mrs. Snyder. It was issued by no court and had no legal sanction. It contained the argument that the "post-mortem examination" prescribed by Section 807 of the Penal Code does not contain the word "body."

Warden Lewis referred the document to his legal advisors about two hours before the execution of Mrs. Snyder and Henry Judd Gray and was advised to do nothing that would interfere with the execution. He called for an autopsy and that such an autopsy should be conducted. It actually was conducted.

DOCTOR IN WAITING
Had the paper effected its object, Lomax said, it was his intention to remove the body, with the consent of the family, to his home in New Jersey, where he would remain in waiting to inject adrenalin into the heart.

This plan originally was formed by the attorney, he said, but the Warden would not be in the newspaper account of the morning resurrection of John H. Scott, County Clerk of Montclair, N. J., who was brought back to life by Dr. Joseph Lomax, who had suffered a fatal stroke, after seven hours of apparent death.

"Mrs. Snyder was aware of the plan," said the lawyer. "When I told her of it she smiled and said: 'Oh, well, that chair kills you, all right.'"

MOTHS DIDN'T KNOW
Lomax and Mrs. Josephine Brown and Andrew Brown, brother and sister of the woman, did not know of the plan. He refused to name the physician who was a party to the plan, saying it would be a violation of ethics.

Speaking just before the execution Warden Lewis said there is a longstanding theory that the death of a child is caused by a doctor killing the child and that the autopsy is the real cause of death. In the past, three or four shocks were given with intervals between, he said, in case

LINDBERGH FLIES AWAY FOR REST

Air Hero Goes to Small Village in Panama for Five Days' Vacation

PANAMA, Jan. 14. (AP)—Free for the moment of the continuous rounds of receptions and functions that have marked his good-will visit to Mexico and Central America, Col. Charles A. Lindbergh tonight was on vacation, the first real opportunity for rest that he has had since he left Washington December 13, 1927.

The American air hero, accompanied by several of his fellow aviators in the American Army, left Col. Lindbergh at 9:40 a.m. this morning and two hours later the post of operations, Pan American Flying Club, was reached. The American Army had had word that he had landed safely in the little village of Bouquette, about 300 miles from Panama, where he will spend four or five days before continuing his tour to the West Indies route to the Pan-American Conference at Havana.

Bouquette is a tiny village in the heart of the jungle. It contains the shadow of Mount Etna which has been extinct for four or five hundred years. The village is about 4000 feet above sea level and is not far from David, capital of the province.

DEMOCRATS TO BUILD NEW HALL**Temporary Auditorium Will Rise in Houston****Smith Platform Suggestion Shelved Till April****Governor Urges Early Draft of Party Planks**

WASHINGTON, Jan. 14. (AP)—The suggestion of Gov. Smith of New York for an early draft of a tentative Democratic platform will be considered by the committee on arrangements for the June convention at the earliest possible date, it was decided yesterday.

In revealing this plan today, Chairman Jesse R. Jones also announced that a temporary convention hall seating 20,000 will be erected in Houston at an approximate cost of \$100,000. The present auditorium there seats only 6000.

OLD POLICY CALLED ERROR

Gov. Smith in his letter read as the Jackson Day dinner, said he believes the Democrats "erred in the past by waiting for the national convention to make the inevitable task of preparing a platform," and advocated a tentative declaration of party principles "at the earliest possible moment."

Oppositions for and against the idea have been expressed by members of the national committee here for a congressional meeting, and now the suggestion has been deferred by the arrangements committee until April, when it will be taken up. Chairman Jones will, with many others, be present.

CITY TO VOLUNTEER SITE

Jones, who lives in Houston, plans to consult with architects in New York tomorrow regarding specifications for the large temporary convention structure. Work has been given by H. A. Halverson, Houston land and tax commissioner, that the city will volunteer recently acquired public land in the Heights section of Houston for a site. This tract is favored by Jones, since it is located within easy reach of downtown Houston, where the majority of delegates will be housed.

Houston's successful convention bid had no relation to the Democratic National Committee debt, said Jones, who added that the approximately \$100,000, and is expected to be wiped out by contributions from wealthy Democrats.

Future of Arts Confab Subject

IOWA CITY (Iowa), Jan. 14. (AP)—The future of the fine arts in America and the need for more money for greater effectiveness will be considered at a national conference on dramatics, music and graphics and plastic arts to be held at the University of Iowa, from Jan. 16 to 18.

The gathering was called by President Walter A. Jessup of the university, who invited fine arts teachers of American universities to attend. Dr. Frederick P. Kappel of New York, president of the Carnegie Foundation, will be among the speakers.

MICHIGAN FIEND HUNTED**Search for Criminal Paralleling Hickman Here Goes on at White Head of Fury**

FLINT (Mich.) Jan. 14. (Exclusive)—The desire to capture the kidnaper and murderer of 5-year-old Dorothy Schneider, whose body was frightfully mutilated and thrown into an ice-covered creek Thursday afternoon, increased today under pressure of a widespread wave of indignation. Undaunted by repeated failure of "hot tips" to materialize, city officers, citizens and State police continue to run down clues and search for new ones.

Authorities are of the opinion that the slayer lives within a fifty or seventy-five-mile radius of the scene of his crime and has returned to his home to remain in hiding until the punishment subsides.

Schneider, the father of the murdered girl, counted his cash today. It amounted to \$60. This, he said, he would spend for a little dress for his daughter to be buried in. Flint citizens, however, have an entirely different opinion.

Schneider enlisted in the Marines Corps during the World War, and, although he was too old to be accepted at the time, he heroically advanced his age so that he would be accepted.

The 36-year-old mother of the dead child was not permitted to view the body of her daughter, but she gave her under paroxysms of the opinion that she could not stand the shock.

Either of the knife thrusts would have caused death, the coroner said. One on the right side pierced the heart; the other on the left cut the heart.

INDIANA SUSPECT

RICHMOND (Ind.) Jan. 14. (Exclusive)—Police here tonight announced that their apprehension of a man arrested this afternoon seemed to coincide with the identity of the man who kidnapped and murdered Dorothy Schneider at Flint, Mich.

He is 36 years old, weighs 160 pounds, is five feet ten inches tall and has dark clothing. The man gave his name as Earl W. Bell, 47 years of age, of Indianapolis. Well known in the city, he is a tax collector.

Elmer Berg of Richmond tonight told police he had picked up the man at Berne, Ind., after he had alighted from a truck. The truck's owner, Zell said. Berg said the man talked incessantly of the Gray-Snyder case.

Imperial Yacht Club Now School

KIEL, Jan. 14. (AP)—As if a magician had waved a transforming wand before the building, the once-famous Imperial Yacht Club has been changed from a place of jollity to one of studious silence. A few years ago the building, built for the pleasure parties attended by the former Kaiser, other European royalties and distinguished guests. Now it is an annex of the University of Kiel Institute of International Economics.

The building, owned by Frau and Herr Krupp von Bohlen und Halbach of Berlin, was presented to them by their son, the late Prince Friedrich, last November. Now a reading room, walls once adorned with exquisite paintings of yachting scenes have been covered by an immense library containing 10,000 volumes. The room and easy chairs are distributed through the hall and stillness reigns in place of the boisterous jollity so characteristic of amateurs and professional sailors.

Formerly government libraries are being added in England to reinforce the new law against adultery.

WHY DRY AGENTS FAILED AT QUIZ**Tests on Which 75 Per Cent Flunked Given Out****Wide Range of Questions Covers Duties****Mental Examinations Put Up Many Twisters****CHAIN STORE IDEA PLAN IN MINE GROUP****Capitalists Familiar With Method Purchase Claims in Montana District**

HELENA (Mont.) Jan. 14. (AP)—An idea of chain-store business methods to mining operation is proposed by a group of capitalists who have purchased eight neighboring mine properties in the Helena district.

Included in the group of owners are William Dainger, organizer and chairman of the Montana state association; David Arneson, head of a chain of florist stores; Herbert F. DeBauer, publisher and capitalist; Eugene M. Schaeffer, capitalist and founder of the local newspaper.

Becoming interested in the development of the East Pacific mine, DeBauer explained, the company's idea is that a group of properties can be operated more economically than a single mine even though, as in this case, the mines are distributed in metal and silver.

"The mental tests required the applicants to pick from materials given to them and answer questions. One of these questions read:

"A number of pint bottles of whisky were found in an automobile. What was the cause?"

The three parent agencies will continue to act as separate corporate entities, a single board of trustees will have general responsibility for the business administration of the institution and, for the development of

PLAN RESEARCH IN MANY LINES**New Brookings Institution to Cover Wide Field****Funds Assured to Promote Washington Project****Savants to Delve Deep in Humanistic Sciences****EDISON GOES ON MILK DIET**

FORT MYERS (Fla.) Jan. 14. (AP)—Thomas A. Edison today turned his inventive mind to contemplation of some 1500 variegated plants, from which he expects to find thirty to fifty that will bear rubber.

Appointed by a tendon-torn wrist when Mrs. Edison arrived with him, called old-fashioned drapery, the wizard of Menlo Park came to the south last night for a four-month vacation. Mr. Edison announced that she imposed the dietary restriction.

His experiments with rubber

broad lines of policy. The trustees are not to express their views upon the scientific investigations conducted by the institution, but only to make recommendations for work under the most favorable auspices.

The new institute is to combine in one great organization the Institute of Economics, the Institute for Government Research and the Robert Brookings Graduate School of Economics and Government.

The institution is named in honor of Robert S. Brookings, founder of the school and during recent years a prominent figure in the national capital, well known for his war service and as the founder of the Brookings Institution, which includes the nucleus of the New Brookings Institution.

FUNDS ASSURED

Dr. Harold G. Moulton, Director of the Institute of Economics and Chairman of the problems and policy committee, has been elected president. An endowment of several million dollars already is assured to promote the project.

The three parent agencies will continue to act as separate corporate entities, a single board of trustees will have general responsibility for the business administration of the institution and, for the development of

the study of the institution.

Scientific and economic consultations will be attempted on such problems as farm relief, disposition of Muscle Shoals, development of inland waterways, monetary and fiscal policies, international equilibrium of foreign relations.

"A major purpose of the institution is to be a center for publication of research work. The national Capitol is a vast repository of materials bearing upon economic, political, historical, social, administrative, and legal problems. The institution will cover

the two should not live peacefully side by side. One does not preclude the other. And orchestra players are speedily learning to manipulate the two types of music simultaneously."

"My regular jazz band is composed of twelve members. I simply hire men from the city of Los Angeles. They seem quite as enthusiastic about our type of music as are my regular members."

NEW YORK AUTO SHOW SUCCESS

Ford Exhibit Also Draws Huge Throngs

Sales at Both Estimated at \$2,000,000

Week's Activities Prove Advertising Boon

NEW YORK, Jan. 14. (AP)—A million and a quarter persons attended the week's national automobile show and the separate Ford industrial exhibit, ending tonight.

New cars worth at least \$2,000,000 were ordered.

More than \$850,000 was spent for advertising.

These estimates were made by various officials for the Associated Press.

A million persons were checked at the gates of Madison Square Garden, where the Ford company exhibited its products without charge. An average of more than 35,000 persons daily attended the national show at the Grand Central Palace, where there was an admission fee.

Official estimates of the sales will not be obtainable for some time, but it is said \$2,000,000 is a conservative guess.

Advertising authorities said the week's advertising in nine New York papers and four trade journals alone will probably total \$800,000. No estimates are obtainable for other advertising media.

The nine newspapers printed 784,038 agate lines. One leading trade journal estimated 264 pages of advertising at \$500.

Newspapers and trade journals report the volume of advertising heavier than ever before. Officials of the industry said it was the most successful in the history of the industry. The Ford company is planning to tour other cities, with Chicago the first stop.

Bankrupt Says Shaw Adversary

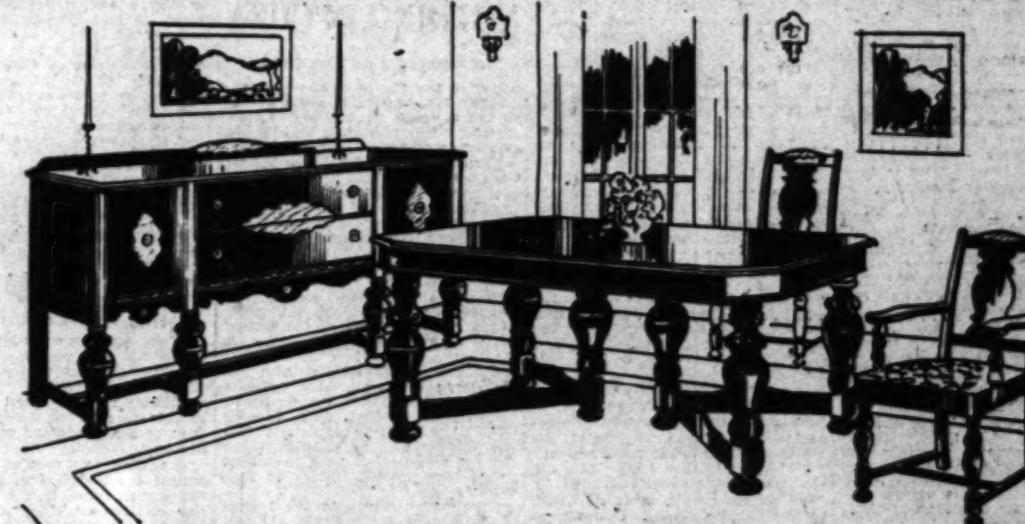

NEW YORK, Jan. 14. (AP)—Will A. Page, electrical engineer, who is being sued for \$100,000 by George Bernard Shaw, Irish dramatist, today filed a voluntary petition in bankruptcy, listing his total assets at \$100 and liabilities totaling more than \$100,000.

Shaw brought suit when Page published a book reprinting numerous letters from the dramatist written in connection with negotiations for production rights. Shaw claimed that the letters were of a personal character and their publication had damaged him to the amount asked.

FITZGERALD'S FOR THE ADVANCEMENT OF MUSIC

Mothers!

Can You Afford to Leave MUSIC
Out of Your Children's Education?

"After reading, writing, arithmetic and geometry, MUSIC has greater practical value than any other subject taught in the schools," says P. P. Claxton, U. S. Commissioner of Education.

Every child should be given an opportunity to create music. She should have a piano and be taught to play it. Modern methods of teaching now make it easy to learn.

The piano is the basic musical instrument, the most practical for musical and cultural purposes, say leading educators and musicians. Consult a music teacher today.

Choose from one of the dominant piano names listed below—each one with a proven reputation of many years standing. All offer the greatest value—in musical happiness down through the years. \$295 to \$1,000. Liberal terms. Knabe Mehlbin Fischer Franklin Taber Behr Bros. Listz

MARIE GREETED ON ANNIVERSARY

Rumanian Queen Married Thirty-five Years Ago

Tribute at Late King's Grave Her First Act for Day

Distress Caused by Lack of Message from Carol

BUCHAREST, Jan. 16. (P)—Queen Marie has just celebrated her thirty-fifth wedding anniversary. Marrying King Ferdinand when only 17 years of age, every year of the sovereign's wedlock has been full of stirring happenings and exciting events, including her life with unusual glamor, variety and richness.

Today, at 85, the dowager Queen looks as young as she did 35 years ago, and the anniversary was a pleasure. Fresh flowers and "the eternal lamp of remembrance" on Ferdinand's grave. The versatile Queen still works sixteen hours a day, devoting several hours each morning to writing her memoirs.

While the regency and Little King Michael are now in their sixties, the Rumanians are still in the throes of political strife. Her own experience on the throne has not been without its difficulties, but she has always been a positive force for many years to come.

At her own request, relatives and friends refrained from giving her the usual gifts of gold and jewels because she still is in mourning for the King. But she could not prevent a steady stream of congratulatory telegrams from all parts of the world, conveying the best wishes for the future. One of these was from her cousin, King George and Queen Mary of England, whose message was signed "With love from the late King Ferdinand." She was distressed, however, because she received no message from former Crown Prince Carol, who on all previous occasions had given her gifts and flowers.

The widowed Queen spent the day quietly with Princess Ileana at her palace in the outskirts of Bucharest, devoting most of the time to sending Christmas cards from friends and admirers in America and other countries.

Today brings me a flood of messages both happy and sad," said she to the Associated Press correspondents as she surveyed the vista of thirty-five years of married life. "In my heart, I am very happy, but it is a great solace to know that my dear American friends have not forgotten me. Please tell them how moved and grateful I am for their constant sympathy, thoughtfulness and good-nature."

ONE KILLED IN CHICAGO GUN BATTLE

Two Policemen and One Spectator Wounded at Huge Pullman Car Plans

CHICAGO, Jan. 16. (Exclusive)—One man, a former sergeant in the United States Army, was killed and two others wounded in a pistol battle in the yards of the huge plant of the Pullman Car Manufacturing Company today.

The former soldier who was killed had been arrested by the two policemen for terrorizing employees of the Pullman company and all the details of the killing and the fight which followed his arrest caused a panic as hundreds of the workers, streaming through the gates on their way home, showed the plant had been bombed by bandits.

The dead man was Herman Miller, 40 years of age, employed as a supervisor of the men who work in the head end of the plant. He was wounded are policeman Michael Shannon and policeman Patrick Devine, and an employee, Anthony Kawaia.

FORTY SLAIN BY MARINE FLYERS

(Continues from First Page)

put into effect immediately for the campaign against the former Liberal general Sandino, who has been active in the region of Nueva Segovia.

For the moment the rebels are in

control.

Col. Mason Quirk, commanding the Marines, believes that they are hiding in the mountains and that the landing of the Marine and National Guard patrols. Marine air planes which returned from Nueva Segovia last evening reported that no new developments had been noted in the last day or two.

Four or five planes flew to Ocotlán and Quilalí every morning. They are undoubtedly seeking out the expected hiding places where rebels might be located. On several occasions groups of rebels have been found and their machine guns are brought into play by the airplane men.

The new electoral law giving Brig. Gen. Francisco McCloskey dictatorial powers as the coming election has been adopted by the Senate, but is meeting with opposition in the Chamber of Deputies. The members of the Deputies assembly are of the opinion that the electoral law is unconstitutional.

PARADE OF PROTEST BROKEN UP IN EAST

NEW YORK, Jan. 14. (P)—Police broke up a demonstration outside the State Department yesterday afternoon when 400 men and women paraded in protest against American intervention in Nicaragua.

The marchers described themselves with placards as members of the Young Workers' League and the Workers' (Communist) party.

ITINERARY GIVEN FOR PAGE LECTURES

BERKELEY, Jan. 14. (Exclusive)—The California itinerary of Kirby Page, clergymen lecturer and author of several works of historical fiction, is announced by E. L. Donisthorpe, general secretary of the University of California Y.M.C.A. Page will speak at the San Joaquin, Fresno, Chico, Sacramento, Los Angeles, and Santa Ana; Wednesday, University of California at Los Angeles and University of Southern California;

Wednesday, Pomona, and Los Angeles;

Thursday, Glendale, Ontario, and Pasadena;

Friday, San Fran-

Long Court Battle Said to be Certain if Bill Wins

Amendments to Measure Will be Offered Next Week

Senate Group Opens Hearing on Project Tuesday

(Continued from First Page)

Washington while the States involve in the Colorado River project out an agreement.

AMENDMENTS PLANNED

Douglas followed this with the announcement that he will seek next week to have proponents of the present bill accept amendments he will offer, one providing that water users would be entitled to the alluvium of the Colorado River, another to be made by disinterested engineers appointed by the President. Douglas has declared that the \$150,000,000 figure of the bill is too high.

"Resolutions of an international character are without significance," he continued. "If they lack the support of all the members of the Senate, they will not be adopted."

SPAIN'S FAIR LURES AMERICA

United States Will Show Wares at Seville

Commissioners to Direct Work on Buildings

Films Will be Used to Tell of Nation's Products

WASHINGTON, Jan. 14. (Exclusive)—Another move to win Latin-American friendship is emphasized by the departure from New York today of the United States commissioner-general to the Ibero-American Exposition at Seville, Spain. Thomas E. Campbell, former Governor of Arizona, heads the commission named by President Coolidge to arrange our part in the exposition which opens on Columbus Day, October 12, 1928. George T. Cameron of San Francisco also is a member of the commission.

Mr. Cameron will direct the actual construction of the three pavilions designed for the United States by William Templeton Johnson of San Diego. The exposition has been appropriated a total of \$700,000 for our participation. One of the three pavilions will be permanent and after the exposition will be used for the promotion of our products. The other two will be temporary and will be removed to the United States Consulate at Seville and also as a library and reading room for American students attending the local university.

GIVE US PUBLICITY

As the exposition will be visited by thousands of South and Central Americans who never have visited the United States it is expected in Washington that the exhibit of the United States will attract high descriptive publicity for the nation's products and institutions. An improvement in political relations with Latin America is considered a likely by-product.

One of the three pavilions will be a motion-picture auditorium in which will be shown films illustrating agricultural activities, farming, reclamation, irrigation, road construction, etc. A wide range of subjects will be covered including industrial operations and feature pictures representative of the best work of American studios also will be interspersed in the programs. All of which will be free to exposition visitors.

The American commission selected the Spanish school of architecture for your school, a thing you have been demanding, while the second temporary structure, 60 by 120 feet, will show government activities. Only government exhibits will be displayed in these pavilions. A permanent exhibition will be in the designated space in buildings provided by the Spanish exposition authorities.

SITE TO BE ON RIVER

Because our loans to Latin-American countries are so large and because trade with that area is so extensive, it is proposed that the most important countries will be strongly represented at Seville, Spain and Portugal are the only European nations taking part, the exposition being strictly for them. France, Italy, Belgium, Holland, Germany, Switzerland, Austria, Hungary, and Poland are represented. But numerous visitors from Europe and the Near East will give trade opportunities on a scale wider than the scope of the exposition.

The United States has been given a desirable site on the river flowing past the exposition grounds and near the principal Spanish building known as the Alcazar. It is a city of 250,000 population, the largest in Southern Spain, and it was from this vicinity that Columbus started his famous voyage.

Spain has been cordial in taking part in American expositions, notably the Chicago one in 1909 when representatives of Colombia and their ships were sent across the Atlantic successfully and displayed.

Opening in October, the exposition will run through most of the American summer tourist wave until the following June, 1929. But steamship lines are preparing for heavy autumn and winter travel on the adriatic, the north sea and the black sea. Special direct sailings to Spain will attract many persons who customarily go to milder climates in the winter. Special direct sailings to Spain will be provided as well as the usual routes through Europe.

Now Ready

-a New ESSEX SUPER SIX

*New Bodies-Larger and Roomier—
New Appearance from Radiator to Tail Light—
Finer Fittings-Four Wheel Brakes—
High Compression-Long Life Motor &
An Amazing Price*

One look at the new Essex Super-Six will convince you that it will excel in popularity the Essex which has just completed the most successful year ever achieved by a six-cylinder car.

From radiator to tail light it is a smarter, more beautiful car than even the Essex which preceded it. And in performance it surpasses in smoothness, reliability, speed and ease of handling, the standard Essex owners are so proud to proclaim.

You get an impression of completeness and fine quality in the design of every detail. From the new pattern Colonial lights—the higher, narrower radiator with vertical shutters—the heavy sweeping fenders—the rubber-covered running boards—the new improved steering mechanism and the steering wheel similar in design and construction to that now used on the very latest and very highest priced cars—there is outstanding reason for pride.

The bodies are not only new and roomier but are so designed as to give a lasting, solid, rigid service. The roof is flatter—the car is bigger in fact and in appearance. Door fittings, hinges and locks are impressively substantial and lastingly beautiful.

The upholstering is not only durable but is also rich to eye and touch. The seats are form fitting—the backs high and comfortable, the leg room for driver and passengers is generous.

But rich and inspiring as is the appearance of this new Essex, still Essex surpasses itself in performance. Its universally acknowledged supremacy in get-away

and its ability to travel at top speed all day long reaches a new limit.

The get-away is perceptibly faster. You will find at the end of a day's run that you have covered more miles than was possible before.

Essex steering, long famous for its ease, is now smoother than you will find in most cars, regardless of their cost.

The Bendix four-wheel brakes give complete and attention-free control of your car at all speeds over every road condition.

No car near its price uses such large tires—30x5 inches. They may be driven with less air pressure and, of course, add hundreds of miles to tire life.

You can't help feeling that in the new Essex, quality and finest detail are outstanding. It will impress you as being much more than a serviceable transportation vehicle, for in the beauty of its lines, the smartness of every detail, the character of its richly lacquered bodies, the softness of its seats, the feel of its upholstering, as well as its performance, there is everywhere cause for your admiration.

The world's largest sale of six-cylinder cars became an Essex achievement solely because of merit. The car we now invite you to see is so outstandingly superior to anything you can have imagined that you must expect it to command a higher price.

But with all these advantages, there is also an amazing price reduction. The Sedan at \$795 f. o. b. Detroit is \$40 below the Sedan price of last year.

IT MAY BE YOUR NERVES

MEXICANS GIRD FOR REBEL PUSH**Secretary of War Leaves Capital for Conference****Federal Reinforcements Sent to Afflicted Areas****Outlaws to be Pursued and Exterminated**

MEXICO CITY, Jan. 14. (AP)—Both Secretary of War Alvarado and Gen. José Alvarez, chief of President Calles' personal staff, have gone to Coahuila for a military council in regard to plans for crushing rebel movements in the States of Jalisco, Coahuila, Aguascalientes and Nuevo Leon.

Federal reinforcements believed to total several thousand troops have been distributed in the State of Jalisco. Reinforcements also have been sent to other States.

AMARO TO REMAIN

Gen. Amaro expects to remain in the capital and personally direct the campaign.

Press dispatches from Coahuila, State of Michoacan, say that a Federal column commanded by Gen. Juan Domingo, former Governor of Coahuila, has been engaged in a series of brief battles. No other details are given and no reference is made to casualties. Presumably Coahuilans, like some other towns in the district, remain in the hands of rebels.

There is a case of blunder trouble. It is reported that Amaro, and his men, are causing trouble in this part of the state.

There is a case of trouble such as cannot be described. Apprehensions, etc., are entirely correct, but no reference is made to the actual nerves of the body.

Women's Ills Often Yield To All Her Yarn

Thousands of women who suffer from insomnia, headache, colds, or itching conditions, including those who would be delighted if they could only make the simple, Cyno 40 have just stopped into my drug store and said, "Cyno, I am so tired, I can't sleep soundly with this cold." "Don't give up. Don't wait. Put it on tomorrow. Learn the joy of healthful living. No need to risk your health over things because you are not in the mood of your satisfaction, just take Cyno, legal, healing, money back guarantee. It will cost you only 6¢, otherwise nothing."

THE WEEK IN REVIEW

THE CITY

SERVICE-TO-CITY HONORS AWARDED TO J.R. MARTIN

City Board Awards Watch; King Elk Wins Cup; Koster Lauds Industrial Freedom

During the assembled real-estate men to renewed cooperation between Northern and Southern California in the development of the entire State, Frederick H. Koster, founder, director of the United States Chamber of Commerce and vice-president of the California Development Association, last night addressed more than 500 realty men on "United" at the annual banquet of the Los Angeles Board at the Biltmore.

Speaking for the party, Mr. Koster said: "The time has come when a city must be able to live and grow and prosper. The importance of industrial freedom is now more apparent than ever. The importance of the city must be based upon its ability to attract and retain the greatest possible number of industrial enterprises to Los Angeles."

One of the chief aims of the Real Estate Association is to develop resources to help the city to grow and prosper.

The Realty Board was announced as the new president of Mr. Martin, who has been elected president of the Los Angeles Board. The watch is given him for the important work he has done in helping to bring the association to Los Angeles.

Mr. Martin is the first to take over a position with the University of Southern California.

Mr. Koster said: "It is a pleasure to me to welcome Mr. Martin to the presidency of the Los Angeles Board. He has given us a good record and we are confident that he will continue to do a good job."

Mr. Koster said: "We are looking forward to the coming year with great interest and hope. We are confident that the new president will do a good job."

(Continued on Page 2, Column 2)

James R. Martin

growth in population, industry and every field of activity. His talk is regarded as especially significant in view of the recent decision of the Los Angeles Realty Board reuniting of its 1100 members with the California Real Estate Association.

"Realty boards of the various cities of the State with the California Real Estate Association show another concrete example of how the State is working unitedly," said Mr. Koster.

The banquet marked the formal assumption of office of Mr. Brooks as Realty Board president for 1928; Mason Case as first vice-president.

RADIO ACTIVITIES

From Broadcasting Stations to Receiving Sets

FEDERAL RADIO CHIEF RETURNS TO CAPITAL

Harold A. Lafount Completes Tour of Pacific Coast Broadcast Stations and Area

BY RALPH L. POWER

Federal Radio Commissioner Lafount arrives in Washington this afternoon. This leaves him tomorrow for conferences with his colleagues in the radio group before the short-wave hearings which are on the docket for Tuesday.

The country-wide radio-station list of changes effective on February 1 will be made public tomorrow. The changes particularly designed to clear up the Pacific Coast situation, however, will not be effective until March 1 and they will be given out on February 15.

Mr. Lafount's recent visit on the coast, departing from Los Angeles a week ago today, was his first trip as fifth some commissioners, succeeding the late Lieut.-Col. John F. Dill.

Although some critics of the commission have called attention to the fact that apparently Lafount has no technical training, the commission is that he owns a radio set. I am inclined to believe that this is qualification enough for it ought to give him a hearing. He has been here instead of the technical background that has hitherto dwarfed the horizon of the new radio body.

THREE STATIONS SLATED

The fifth some commissioner is carrying back with him recommendations to put more stations off the air in this zone and none of these, he says, is south of the Tehachapi.

Of course there will be certain changes of wave lengths, time divisions and power in the March 1 lists. The grand game of dress-out will look up in our broadcast area. There will be a general review of the sites but there will be no wholesale slaughter as given out six weeks ago.

The power commissioners have been worried terribly by fully 400 applications for new stations. It wasn't enough to have to worry about the 600 already permeating the other regions.

So they grasped, as a bit of propaganda, the throwing off of 300 outifts with the hope that some of the new applicants would fall by the wayside.

NEW APPLICATIONS

Of course many of them did. But the publicity gag proved to be a terrific boomerang from which the commission is just recovering. It brought down on their heads the wrath of the stations who had been gradually getting along with their stations and their constituents.

In California alone there are thirty-three new applications for the Los Angeles area said Mr. Lafount, and this district is the most congested location in the fifth some, which includes also San Jose, Alameda, Marin Islands, with 150 stations.

The Commissioner after all isn't entirely a stranger in California. For several winters since the war, he has resided in the state with his family. With his business partner he owns a prominent bank building in downtown Los Angeles as well as a handsome home in Glendale. His legal residence, however, is in Salt Lake City.

INTERVIEW BROADCASTERS

He held interviews with every station owner or representative in California, Utah, Oregon and Washington. Some of them came alone. Others brought their entire staffs. One less optimistic than the other, perhaps, brought the Mayor of his community and others their pastors.

But Lafount is really wise up and said he would leave everything up to the commission.

Mr. Lafount says he believes, like others, that the time is not far off when international feature programs will be on the air.

He is equally as certain that we will never adopt a license fee for carriers and stations as the dollar tax in Canada.

In his local talks and interviews he explained that as a general thing stations should adopt a helpful attitude of waiting. In this they have become experts.

SECRETARY OF RADIO

"I believe," said Mr. Lafount, "that a Secretary of Communications in the President's Cabinet must come soon. And I also believe that the time is near when the fair division of instruction, religion, music and other features on their schedules."

"There must, of course, be a secret of the future if we are to squeeze 300 stations on eighty-nine channels. Up in Seattle, for instance, one of the church stations gave up its weekly day broadcast to a commercial station and now carries Sunday hours for its religious programs."

"I think that now the problem of radio is much more from the technical side than from the money side. The entire thing must be on a solid, substantial commercial basis. Stations cannot exist on entirely on good wishes. They must be able to pay their bills. We do not have sufficient service with the transmitters that are on the air fifteen or twenty hours a day with a constant stream of blatant, direct advertising."

COMMERCIAL BASIS

"All of this brings us to what is a commercial station. That is not easy to define. A station may not be a full outfit yet it may advertise a product or service, or something or other. It may not sell time, yet be just as much commercial in its way as other stations that make an hourly service charge for advertising."

"The point to point applications must be solved soon. In the Seattle district there are 800 on."

"The difficulties that have been the most serious in the last ten months have been many. The group deserves another year to show what it can do. The police powers of the body should be controlled by the committee itself."

TOO MANY STATIONS

"What we need now is some way to make fewer stations. Someone has broached the suggestion that on nights when the huge chains are on the air they also use the same wavelength and thus release additional local stations fifty or more frequencies for an hour or so."

RADIO OUTFIT USED IN LOCAL THEATER

Ted Roy, known also as "the singing blacksmith" because for the past few years his summers have spent at the forge, will be on the orange network 8 o'clock program tonight.

In the recent Atwater Kent Foundation contest he took second place in the national finals.

His selections tonight will include "The Hills of Home" and "I'm the Last Lass."

**OLD CITY HALL
WORTH \$585,000**

**Building Value Negligible;
Called Liability**

**Jail and Police Building
Fixed at \$92,952**

**Mayor and Council May
Decide to Sell**

City Attorney Stephens yesterday transmitted to the City Council a report of appraisers on the value of the present City Hall, the First-street jail and police station and two other parcels of land owned by the city on Broadway between Pico and Tenth streets. The total value was estimated at \$1,011,000. The purpose of the appraisal was to ascertain the probable total amount to be received for these properties to be sold, for the construction of a new City Hall, police headquarters and health department building in the Civic Center, near the new City Hall. Until this building is built, the health department will remain in the International Building, which blocks the north entrance to the new City Hall.

THOUGHT 'TOO LOW'
The appraisers' estimate was a disappointment at the "City Hall Park," it was believed, the four city properties would sell for at least \$1,500,000. The city appraisers are offered \$1,011,000. Mr. Stephens said he had said that in their opinion if the properties were sold now they would bring even less than their estimates of value.

The appraisers valued the present City Hall site at \$62,000 a front foot, or a total of \$3,600,000; as the lot is 180 feet by 180 feet in size. The City Hall building, the appraisers said, is in fair condition and could be sold for \$100,000. The jail and police station building, built in 1901 on First street between Broadway and Hill street.

The appraisers set a value on the First-street land of \$600 a front foot. The lot on the west side of Broadway, 150 feet south of Tenth street, the appraisers value at \$4,000 a front foot, or a total of \$20,000,000. While the city owns the Broadway lot on the east side of Broadway north of Pico street, the value set by the appraisers is \$1800 a front foot, or \$184,000 total.

MAY DECIDE TO SELL

The Mayor and City Council must decide whether to offer to sell the City Hall, jail and the other two properties to the city before price is paid. The City Hall will be vacated by the middle of March, and will stand empty unless the city officials decide to move the health department into the present City Hall, and then move down the International Building and beautify the north front of the new City Hall. If this plan is followed the city can take the time to sell the three city properties and secure higher prices than a quick sale would bring. The estimated cost of an adequate health department, police headquarters and jail building in the Civic Center is \$1,000,000.

FUNDS GIVEN UNIVERSITY

**Mr. and Mrs. C. N. Flint Endow Philosophy Chair
and Create Trust at U.C.L.A.**

A trust fund of \$100,000 for the purpose of establishing a professorship of philosophy at the University of California at Los Angeles has been tendered the university by Mr. and Mrs. C. N. Flint of Los Angeles. The donors also have caused to be created a trust fund of \$40,000 for the purpose of aiding worthy students whose full opportunity for obtaining an education at the university is denied them.

Mr. and Mrs. Flint have named the Security Trust and Savings Bank of Los Angeles the trustees for these funds, which have been made irrevocable after the death of the donors.

The students' trust provides that, prior to its being exercised, a payment of \$150 a month will be made to the university, toward the support of one or more scholarships.

It is also provided that if arrangements are made whereby the professorship of philosophy may be discontinued, the donors pledge themselves to pay the university \$1000 a subject of his instructing."

VAST THROG JOINS IN PLAY

City's Recreational Facilities Patronized During Past Year by 1,212,227 Children and Adults

A total of 1,212,227 boys, girls and adults were provided with supervised recreation in Los Angeles during the calendar year of 1927, according to a report made to Mayor Cryer yesterday by the Los Angeles Playground and Recreation Department. This huge number is inclusive of those who patronized the municipal beaches at Venice, Santa Monica, Playa del Rey, Cabrillo and Terminal Island.

Officials figures given show that on the city playgrounds proper the attendance was 3,881,000. Patrons of the swimming pools totaled 347,000.

The Men's Municipal Club had an attendance of 2,060,300.

Attendees of the musical entertainments of the department reached 42,280, exclusive of the 1,000 performances of amateur theatricals and plays given in places other than the playgrounds numbered 28,724. Sports lovers to a total of 33,397 attended games held on the departmental playgrounds.

At the summer vacation camps in the forest reserves the registration reached 52,869, while at the boys' and girls' camps in Griffith Park the attendance for overnight visits was 18,000.

Eleven new playgrounds were im-

proved and placed in operation dur-

ing the year, making a total of

121, with six more now under

improvement. Six new sites were ac-

quired during the year, two by lease,

three by purchase and one by gift.

TIME SHORT TO ENTER HORSES

Tomorrow Ends Bookings for Los Angeles Show

Judges of Various Classes Announced Today

Preliminary Charity Event Draws Attention

Entries for the seventh annual Los Angeles national horse show, to be held at the Ambassador Auditorium February 4 to 11, will close tomorrow at 8:30-20 at the Stock Exchange Building.

This announcement is made by J. W. Fairbairn, general agent with headquarters at 210 West Seventh street, announced yesterday.

"Our shipments of citrus fruits and walnuts from California have shown a steady increase during the past two years," said Mr. Fairbairn, "and we expect now to make a greater bid for business in many fields. Linking, as we do, the Pacific Coast with the major eastern markets, we are vitally interested in the building up of the entire coast area."

Mr. Fairbairn was formally appointed with the change in status of the association's president by H. E. Pierpont, vice-president in charge of traffic.

"Effective January 14, the Chicago Milwaukee and St. Paul Railway Company has taken over the properties of the Chicago Milwaukee and St. Paul Railway Company and is assuming all its legal concurrences, powers of attorney, etc., of the receivers. Tariffs to this effect being mailed to you today."

The Williams Line steamer *Willkene*, which smacked the Union tanker *La Breda* and then went aground at the edge of Mormon Lake port Saturday night, was floated early yesterday morning by the aid of several Wright tugs.

For convenience of the crew, the *Willkene* was loaded at the Shell dock, occupied with a paint-scratching, and continued loading at the *La Breda*.

Divers, however, discovered a badly bent rudder on the *Willkene*. Survey was being made late yesterday day to determine on a line of repairs.

Whether it would be possible to dry dock and lift her remains to make repairs in the stream was believed doubtful, and it was held likely she would have to be part of her cargo and go to a shipyard for lifting on the day of arrival.

The latter process will be laborious and costly, as the *Willkene* was loaded to capacity with a big deck cargo of lumber, and was just departing for the Atlantic Coast when the mishap occurred.

SHIPPING

The latter process will be laborious and costly, as the *Willkene* was loaded to capacity with a big deck cargo of lumber, and was just departing for the Atlantic Coast when the mishap occurred.

KEYES GETS EVIDENCE IN SACK DEATH

Grenouise Exhibits Being Arrayed in Preparation for McMillan Trial

An effort to effect a reconciliation with his estranged wife almost ended disastrously last night for Reginald Jackson, 28 years old, son of 611 South Figueroa, attorney, who, going to the door of his wife's apartment at 968 North Kingsley Drive and announcing his presence, he was met by seven revolver shots fired through the door.

Out of the bullets entered Jackson's leg, inflicting a minor wound. He was treated at the Hill Street Receiving Hospital by Dr. George K. Hartman, police surgeon, who is holding Mrs. Ruth Jackson, the estranged wife, for questioning.

HOLD-UP PAIR PICK ON WRONG VICTIM

Ray Jackson and Paul Roman picked the wrong man when they attempted to hold up Paul Petrecais in the 2705 block on West Seventh street Friday evening with cigarette pistol. Petrecais, who is a night watchman, responded by pulling his own revolver and shot and held the pair until the police arrived. They were booked on suspicion of robbery. Jackson is 17 years of age and Roman, 22.

CHAMPAGNE SAVED IN BOAT CEREMONY

SAN FRANCISCO, Jan. 14. (AP)—Miss Claire Murphy, daughter of Fire Chief Murphy, expected to break a bottle of champagne to mark the opening of the Fire Hall, a twenty-six-foot motor sloop, when she christened the craft today. Friends of the chief, however, substituted a bottle of beer, thought better of the idea, and substituted a large bottle of ginger ale, which Claire cracked on the bow, retelling the champagne.

AGED HAWTHORNE MAN ENDS LIFE BY POISON

William W. Groome, 73 years of age, of 875 Gale avenue, Hawthorne, died at night at the General Hospital as the result of poisoning, self-administered, according to the coroner's office report. No reason was found by deputy sheriffs for the suicide.

CUSTER'S LAST CAMPAIGN

LONDON, Jan. 14. (Exclusive)—The new Ministry appointments announced today include Sir A. G. Coombs, member of Parliament for Financial Secretary of the War Office, succeeding Commodore H. Douglas King. Mr. Coombs is the husband of Lady Diana Manners.

HARVARD PROFESSOR DIES

BOSTON, Jan. 14.—Archibald Cary Coolidge, professor of history at Harvard University and formerly in the United States diplomatic service, died tonight at his home here. He was 61 years of age.

COOPER NAMED TO ENGLISH WAR OFFICE

LONDON, Jan. 14. (Exclusive)—The new Ministry appointments announced today include Sir A. G. Coombs, member of Parliament for Financial Secretary of the War Office, succeeding Commodore H. Douglas King. Mr. Coombs is the husband of Lady Diana Manners.

PICTURE

NEW AGE RECORD FOR TRAVEL MADE

Baby Eileen Houston

Baby Crosses Continent on Train Alone

Clutching a little basket in one hand and in the other a packet of picture post cards, and flanked on either side by admiring impromptu train sides, Baby Eileen Houston, 4 years of age, tripped from the Union Pacific Continent Limited yesterday morning.

Eileen set a new age record for transcontinental travel, it was learned, when she was met at Central Station by her mother, Mrs. May Houston, 62, Sunset Avenue, May Avenue, Venice. She had been on a visit to her grandmother home in the gaited classes; Julian Morris and Arthur White, hunters and jumpers; Roland J. Hill of Bakersfield, stock.

An elaborate program is planned

for the reception of the train to arrive here this month from Denver following the close of the 1928 World's Fair.

At the city, the baby will be given

blue-blooded value of approximately \$1,000,000. They will be shipped in a special train of sixteen cars over the Union Pacific, provided by a special force of armed guards.

PRELIMINARY SHOW

Preceding the Ambassador events will be a two-day show January 27 and 28 at the Los Angeles Riding Club under the auspices of the Beverly Hills Equestrian Club.

Irvine H. Helmick, president of the show, which will be held for charity, announced that \$6000 in cash awards will be given winners in the various gaited classes. Shetland entries will be 12.2 hands and under and not 12.2, as previously announced.

Husband Shot at Wife's Door

An effort to effect a reconciliation with his estranged wife almost ended disastrously last night for Reginald Jackson, 28 years old, son of 611 South Figueroa, attorney, who, going to the door of his wife's apartment at 968 North Kingsley Drive and announcing his presence, he was met by seven revolver shots fired through the door.

Out of the bullets entered Jackson's leg, inflicting a minor wound. He was treated at the Hill Street Receiving Hospital by Dr. George K. Hartman, police surgeon, who is holding Mrs. Ruth Jackson, the estranged wife, for questioning.

HOLD-UP PAIR PICK ON WRONG VICTIM

Ray Jackson and Paul Roman picked the wrong man when they attempted to hold up Paul Petrecais in the 2705 block on West Seventh street Friday evening with cigarette pistol. Petrecais, who is a night watchman, responded by pulling his own revolver and shot and held the pair until the police arrived. They were booked on suspicion of robbery. Jackson is 17 years of age and Roman, 22.

CHAMPAGNE SAVED IN BOAT CEREMONY

SAN FRANCISCO, Jan. 14. (AP)—Miss Claire Murphy, daughter of Fire Chief Murphy, expected to break a bottle of champagne to mark the opening of the Fire Hall, a twenty-six-foot motor sloop, when she christened the craft today. Friends of the chief, however, substituted a bottle of beer, thought better of the idea, and substituted a large bottle of ginger ale, which Claire cracked on the bow, retelling the champagne.

AGED HAWTHORNE MAN ENDS LIFE BY POISON

William W. Groome, 73 years of age, of 875 Gale avenue, Hawthorne, died at night at the General Hospital as the result of poisoning, self-administered, according to the coroner's office report. No reason was found by deputy sheriffs for the suicide.

CUSTER'S LAST CAMPAIGN

LONDON, Jan. 14. (Exclusive)—The new Ministry appointments announced today include Sir A. G. Coombs, member of Parliament for Financial Secretary of the War Office, succeeding Commodore H. Douglas King. Mr. Coombs is the husband of Lady Diana Manners.

RAILROAD TO EXPAND COAST WORK

Milwaukee System Agent Notified of Line's Release from Receivership

With the release of the Chicago Milwaukee and St. Paul Railway from the receivership yesterday, it is now in position greatly to expand its activities in Southern California, F. C. Fairbairn, general agent, with headquarters at 210 West Seventh street, announced yesterday.

"Our shipments of citrus fruits and walnuts from California have shown a steady increase during the past two years," said Mr. Fairbairn, "and we expect now to make a greater bid for business in many fields. Linking, as we do, the Pacific Coast with the major eastern markets, we are vitally interested in the building up of the entire coast area."

Mr. Fairbairn was formally appointed with the change in status of the association's president by H. E. Pierpont, vice-president in charge of traffic.

"Effective January 14, the Chicago Milwaukee and St. Paul Railway Company has taken over the properties of the Chicago Milwaukee and St. Paul Railway Company and is assuming all its legal concurrences, powers of attorney, etc., of the receivers. Tariffs to this effect being mailed to you today."

The Williams Line steamer *Willkene*, which smacked the Union tanker *La Breda* and then went aground at the edge of Mormon Lake port Saturday night, was floated early yesterday morning by the aid of several Wright tugs.

For convenience of the crew, the *Willkene* was loaded at the Shell dock, occupied with a paint-scratching, and continued loading at the *La Breda*.

Divers, however, discovered a badly bent rudder on the *Willkene*. Survey was being made late yesterday day to determine on a line of repairs.

Whether it would be possible to dry dock and lift her remains to make repairs in the stream was believed doubtful, and it was held likely she would have to be part of her cargo and go to a shipyard for lifting on the day of arrival.

The latter process will be laborious and costly, as the *Willkene* was loaded to capacity with a big deck cargo of lumber, and was just departing for the Atlantic Coast when the mishap occurred.

FINANCIAL

SCHOOL SAVINGS ACCOUNTS CLIMB

Success of Plan Realized After Five Years

Total for Period Exceeds Million Dollars

Average Deposit Reflects Thrift of Students

Savings accounts under the Los Angeles School Savings Plan, at the end of its fifth year, December 31, 1927, totalled \$1,031,965.56 and contained 51,290 accounts, making an average of \$20.13 per account, it was announced yesterday by A. Waller Morton, vice-president of the Merchants' National Trust and Savings Bank, and president of the Los Angeles Banks School Savings Association.

"The opening of such large numbers of juvenile accounts and the accumulation of over \$1,000,000, only five years after the start of the movement," declared Mr. Morton. "In addition to the thousands of school savings bank accounts opened, these boys and girls are learning the value of money, how to save it and how to save it, what to save it for and how to spend it judiciously. In fact, it is safe to say that in the past five years we have seen a marked increase in the number of young people at the tender age susceptible to assimilation of the thrifty idea. Today over 225 principals and approximately 5000 teachers are busily working to teach it."

The Los Angeles plan of school savings is one in which all banks in the community may participate, sharing alike the expense and the profits. All pupils, principals and teachers of bookkeeping and the handling of money and bring pupils in direct contact with the banks and their officers. The plan appeals to their honor to save and supplies them with coin safes for accumulation of small change.

Mr. Morton stated that the excellent results during 1927 was indicative of the full co-operation of the Board of Education, superintendent of schools, principals, teachers and bankers.

High Standard of Dried Fruit to be Kept Up

DEL MONTE (Cal.) Jan. 14. (P)—The California Dried Fruit Association at its annual convention here, which adjourned today, recommended itself to the public as a movement in the interest of California dried fruit.

"The only hope for California's competitive world leadership in the dried-fruit industry lies in the development of the market for California dried fruit," said secretary Dwight K. Grady, who emphasized the fact that today Europe consumes as much California dried fruit as America does.

"Today," said Grady, "the dried-fruit industry is the third largest industry in the State. Approximately \$100,000,000 of dried fruit was produced in the State during 1926. In the last two years the bearing acreage has increased 40 per cent. The problem now before us is to stimulate world demand to keep pace with California's rapidly growing dried-fruit production."

Two Added to Harris Trust Directorate

Two new directors, John J. O'Brien and Frank McNair, were elected to the board of the Harris Trust and Savings Bank of Chicago. It was announced yesterday following the annual meeting of the bank.

Mr. O'Brien is president of H. M. Bylinsky & Co., and Mr. McNair vice-president. All of the existing directors were re-elected. It was reported.

Paul S. Russell was elected vice-president and Norman W. Harris vice-president and secretary at the annual meeting of the bank. No other changes were announced in the personnel of the executives.

BANK PICKS OFFICERS

South Gate National Board Names Mason Case President

ROTH GATE, Jan. 14. (Exclusive)—Announcement has been made of the re-election of Mason Case as president of the South Gate National Bank at the annual meeting of the board of directors. Other officers were re-elected: First vice-president, O. E. McCarthey, second vice-president, and J. Jay Smith. D. Snyder and Robert C. Mason, members of the board, were also re-elected.

It was reported at the directors' meeting that deposits on December 31, 1927 were \$450,192. This compares with \$430,000 on December 31, 1926. Total resources of the bank at the first of this year were given as \$494,050.

Officers discussed for increasing facilities of the institution to meet demands expected when the new \$700,000 plant of the First National Bank is completed. Construction is put into operation probably before summer. It has been announced that the plant on a Los Angeles county site adjoining South Gate, will employ 2500 persons at the outset.

PRICES DECLINE ON STOCK MARKET

Reaction Follows Advance Early Trading

Wave of Short Selling Yields Most Gain

Motor List Leaders Continue Under Pressure

NEW YORK, JAN. 14. (P.T.)—The long list of bonds of the Chicago, Milwaukee and St. Paul Railroad started upward again in today's market, giving a little color to an otherwise dull session. The remainder of the list continued to mark time at times, but the eye on the problem trend of the market remained following election yesterday of fourteen directors. Practically all the bonds, however, were up, with some, yesterday, even more above their lows of last year.

Sales of three issues in today's session were as follows:

Other railway lists pursued the even course of the past few days, with an undulation of gains. Erie, with large amounts, but were supported by a small fraction under the last closing price. Seaboard All Florida B also sagged slightly.

Chicago Iron and Steel Certificate is again spurred upward, reaching 146 1/2 for the first time in a year or more. This quotation compares with a low in 1927 of 47 1/2. It reached new peak territory on a small turnover, but other public utilities were more active. Consolidated Gas moved upward in the first hour, but subsequently fell back on profit-taking.

Already large offerings of Pueblo were absorbed with little net change in price. Otherwise the foreign group attracted little attention, and prices established no definite trend.

United States government obligations were inactive.

Long-term issues aggregated about \$124,000,000 compared with approximately \$64,000,000 last week.

The aviation market saw sales of bonds in the \$100 and the \$100 and 1/2 range. The market was quiet, but the day closed with a slight gain.

Marbelite Common was the only issue to show a decided gain, rising 1 to 7 points above previous quotations.

There was little in the day to influence the price movement of the steel stocks, which opened 10 points higher on buying pressure, but influenced by the closing of new television radio stations, lost the gains and closed 1/2 point lower at 146 1/2. Steel common, however, was higher at 146 1/2 and then fell to 146, of 2 1/4 points net.

Despite the optimism of some executives, selling pressure under selling pressure. Contractors closed 2 1/4 points lower and Hudson, Ely, Dodge, Ford, and Studebaker all fell 1/2 point, turned upward just before the close, but the net gain was fractional.

Violent fluctuations again marked the trading in some of the high-priced industrial stocks. Greene Colman Copper rose 1/2 point to 135 1/2 and rallied 1 1/2 points to 137. Cast Iron and Steel, and Midland Steel, both preferred, all sold off 4 or so.

Unsettled crop credit market showed a deficit of \$20,700,000 as of Dec. 31. Reserve rediscoun't rates were totaled \$62,400,000. Results in the Federal Home Loan Bank of the West, the detailed statement of actual condition this day, decreased in size of 20 items. Loans increased and deposits decreased, until the future trend of market becomes more clearly defined in their week-end meeting.

The weekly clearing-house statement showed a deficit of \$20,700,000 as of Dec. 31. Reserve rediscoun't rates were totaled \$62,400,000. Results in the Federal Home Loan Bank of the West, the detailed statement of actual condition this day, decreased in size of 20 items. Loans increased and deposits decreased, until the future trend of market becomes more clearly defined in their week-end meeting.

Results of 1927 operations compared with those of 1926, in concise, understandable terms, now being published.

Jack Mehlhorn

Wild Bill Mehlhorn Crashes Par to Lead Long Beach Golf Field at Half-Way Mark

CLICKS OFF 68 TO PACE EVENT

Nated Pro Chalks Up Mark of 138 for 36 Holes

Von Elm Second With 140 in Sensational Play

Final Dash for Golf Crown at Virginia Today

(Continued from First Page)
set competition of this, or any other season.

MELHORN COLORFUL
Bill Mehlhorn tried hard in the last Los Angeles open championships. William is a mighty fine golfer—so good in fact that he is always called up in national and overseas affairs. Mehlhorn led both the United States and British Opens at the end of the first round two years ago. Bill has the unhappy faculty of finding trouble along about his third round, but if William gets by now without trouble, he will be golfer in the Los Angeles field qualified to catch him during the last gap.

Mehlhorn has played golf for the past six months without knowing just where his position was. He is one of the sweetest wood-shot players in the world and yesterday gave a gallery of several thousand spectators that saw a towering hedge, a fence and automobile park, two traps and a lot of rough to reach the eighteenth green. Harry caught the large green early, but Mehlhorn's tee shot was forty feet, nearer the hole than Harry's.

Mehlhorn started to putt at Wilshire last week and threatened to golf away with the Los Angeles open crown. Trouble came up with the leaders—he will do even better in the competition concluding at Long Beach today.

VON ELM DANGEROUS
George Von Elm is back. The former United States amateur champion is back again, too. The boy who topped the Open when the greatest golfer in the world was at his best is once more playing winning golf. "Elm" can run with the medal in the Los Angeles open tournament championship, and since that time, while he has shown brief flashes of his former form, has continued to low strokes on the green.

Larry Mahon—and, in fact, George Espinoza—was not only laying that old apple "dead," but he is also striking his putts in great style. George allowed his thoughts to wander while entering the tee box on the last green at Long Beach yesterday and the lapse of concentration knocked him out of a 70—which would have been one stroke closer. William (Gelling) Mehlhorn.

George won't miss many shots today—neither will Mac Smith, Armon, Crenshaw, Turner, Al Moore, Lee Scott, and others. Gofers still very much in the running for the Long Beach championship—which carries a first-place purse of \$750. Larry Nabholz, former champion, probably got more than a 70 Friday, struck golfing pay dirt with a 70 at Long Beach yesterday. Larry golfed well enough to have come within ten strokes of the lead within four hours and while he didn't score so well at Wilshire last week—Larry was hitting the longest tee shots in the field. No one has come closer to that to quote Al Espinoza—"Larry didn't know what he did with them—didn't know what shot he came next."

LEO MAY GO GOLF WILD

The happy—or unhappy faculty of outdriving an opponent likewise belongs to Leo May. In the P.G.A. championship two years ago, at the time Leo was playing much better than Hagen, his opponent, Hagen watched Leo outdrive him on every hole. Now that Hagen's iron work was more than Leo could duplicate—in fact Leo was charged with having lost his one great chance at the championship by driving at the same spot—minus the accuracy and without knowledge of the distance Hagen was cunningly concealing in his masterful stroking.

Leo cut both hands Friday when he learned that Vic Fazio isn't going to play. Yesterday Leo wouldn't even walk through a screen door. If the pain of the heart attack made him afraid to play today, "scrapping" Leo is just capable of burning up the Virginia course and annexing the championship now claimed by Tommy Armour.

Joe Schmitz, former New York professional, with a 71 yesterday, is right there—knocking on the door marked "Winner." Joe will continue at his best in the two-jaw journey to the title. The man who beat Hagen in the last P.G.A. can just collect his share of the breaks. "Homecoming" Leo is going to be close enough to demand a recount when the scores are checked late tomorrow afternoon.

Lorenzo Schmitz, former Lima (Ohio) pro, who will succeed Larry in the Open, is off to a fast start and is still up with the pacemakers after a 73 at Long Beach yesterday. Al Espinoza, near the lead during the first nine holes, was overtaken by Tommie Armour, Al Watrous, Ed Dunn, and Harold Thompson, Leonard Schmitz, Joe Turnesa.

YOUTH AND VETERAN IN DUEL OF SPEED TODAY

Ralph De Palma (top), now in his twenty-first year as a race driver, will battle George Souders, the college kid winner of the last Indianapolis 500-mile classic, at Ascot today. They are scheduled to meet in the best two out of three five-lap heats, and new track records are anticipated as the result of the duel.

fessional, who gained international fame while putting an old black brick pipe to near-victory in 1929, is still in the race. He is still very much in the drive for gold. John has lost his chip approach that threatened to upset the lead of the young world—but John still has the uncanny knack of smacking shots, same "uncanny knock" repeated in a 72 yesterday, for a thirty-hole aggregate of 142.

No tournament has ever boasted of a more distinguished field than the noted group competing in the Long Beach classic. Three Martin brothers, Eddie, George, and Charles; Macdonald Smith, claim Carmel, Scotland, as their place of birth. All three and David, son of Ernest, successfully qualified yesterday. Ernest of Spokane and his partner, competing with 148; George, Virginia City pro, was second; 146; Nutt, professional at Reno, Nevada, landed in the 150 bracket, while the youthful David finished with a 150, also.

AND THE MORE CLAN

The Morrison brothers—Fred, Middle, and Eddie—of Westport, Connecticut, and other gofers still very much in the running for the Long Beach championship—which carries a first-place purse of \$750.

Larry Nabholz, former champion, probably got more than a 70 Friday, struck golfing pay dirt with a 70 at Long Beach yesterday.

Larry golfed well enough to have come within ten strokes of the lead within four hours and while he didn't score so well at Wilshire last week—Larry was hitting the longest tee shots in the field. No one has come closer to that to quote Al Espinoza—"Larry didn't know what he did with them—didn't know what shot he came next."

Joe Schmitz, former New York professional, with a 71 yesterday, is right there—knocking on the door marked "Winner." Joe will continue at his best in the two-jaw journey to the title. The man who beat Hagen in the last P.G.A. can just collect his share of the breaks. "Homecoming" Leo is going to be close enough to demand a recount when the scores are checked late tomorrow afternoon.

Lorenzo Schmitz, former Lima (Ohio) pro, who will succeed Larry in the Open, is off to a fast start and is still up with the pacemakers after a 73 at Long Beach yesterday. Al Espinoza, near the lead during the first nine holes, was overtaken by Tommie Armour, Al Watrous, Ed Dunn, and Harold Thompson, Leonard Schmitz, Joe Turnesa.

Red Grange's New York Yankees Take on Ernie Nevers and His Giants This Afternoon

PROS MEET AT WRIGLEY FIELD

Tico Stanford Stars Playing on Ernie's Team

Tut Imlay Quarterback for Grange's Foes

Wild Bill Kelly Ready for Action Today

Reunifying "Pop" Warner's football system in its perfect state, Ernie Nevers will send his Giants against Red Grange's Yankees at Wrigley Field this afternoon in the second game of the professional football tournament.

"Tico" Tico Stanford, great halfback star for California a few years ago, is handing the squad over to Nevers.

In the professional season just ended, Tico was the man who led Warner's famous squad. All the players on the squad were well grounded in football and many of them played the Warner system in college.

There are five former Stanford football men on the squad and all of them were stars in school.

CAPTAIN FOR 1925 TEAM

Nevers captained the 1925 team and Fred Nevers, who will play left end, was captain of the 1926 team. Ted and Harry Shipley, who will play left end and tackle, respectively, were mentioned on all American teams while playing for the 1925 Cardinals. Grange Johnson will be in command of the Yankees at tackle.

Grange has had his squad working two hours each day as he tries to knock over the Giants this afternoon. He will play left end and tackle, respectively, were mentioned on all American teams while playing for the 1925 Cardinals. Grange Johnson will be in command of the Yankees at tackle.

Second only to the game itself will be the battle between Jim Lawson of the Yankees and Ted Givens of the Giants. Lawson was the captain of the 1924 Stanford team. That means there will be three former Stanford captains on the field, battling each other today.

Lawson knows the Stanford reverse plays perfectly and he will be out there in an attempt to prevent any of his former team-mates from circling him.

In college while Nevers was the star pitcher on the baseball team, Lawson did the catching. He will attempt to catch Nevers on the football field.

TO SPLASH POOL

Five per cent of the gate receipts in the games at Wrigley Field and in San Francisco will go to a pool to be distributed among the members of the winning team. That has caused the players on each squad to work hard for the contest and it will mean nearly \$500 to each man at the end of the game.

Gobb Rooney, who showed here last year, is the quarterback for the Giants. Thompson played with Erich Muller, California has lost one and was a tower of strength at tackle. He is playing center for the Nevers-Yevers.

For the first time in history of pro football, the public's efforts are being made to have organized rooting at a game. A section of the stands has been set aside for former California and Stanford players. They will cheer on the men who helped make gridiron history at their schools.

Will Bill Kally of Montana who was handicapped last week because of a sprained knee, be able to play in the contest today? Morris Brodrige, who learned how to handle the Warner reverses while playing at U.C.L.A., will also get a chance to show his stuff.

Officials of the professional football tournament have decided to make popular prices prevail and have set the cost at \$2.50 for the spectators.

The kick-off will be at 8:15 o'clock.

COLLEGE FOES ARE PRO RIVALS NOW

Years ago "Tut" Imlay used to represent California on the gridiron, as did Jim Lawson, former Stanford and the boy made as college football on many occasions. Tut is now known for running each other as Wright by "Pop" Warner, Stanford captain last year, is playing with Indiana against Lawson. Tut being one of the big stars of Ernie Nevers's team while Lawson has been with Grange's Yankees two seasons.

SAGEHENNS TAKE ON QUAKERS

Rival Quintets Clash at Whittier Saturday Night

CLAREMONT, Jan. 14. (Exclusive)

Running up against the stiffer competition they have yet encountered, Pomona Valley basketball foes journey down to Whittier next Saturday for a tussle with the strong Fox outfit. It will be the third round of Southern California conference competition for both squads, the Foxes having played and won two games.

Next Saturday promises to be one of the most exciting games in the whole season. Conference regulars are out of the running as a championship contender, having lost to La Verne in its opening game, but Whittier has a chance to win the race. The Sagehens will be battling to regain some of their lost prestige and Whittier isn't going to let a championship without a whimper. So the game promises to be a thriller. It will be played at Whittier.

COACH "BEERY" HEATH

Coach "Beery" Heath, the astute Pomona master, has finally gotten his team into a scoring mood and working a machine-like offensive. The Sagehen coaches ought to give Whittier plenty of trouble. Joe Santa Cruz, and Frank Dyer, a hard-working sophomore, have both shown good form and are improving daily this year. They will make things interesting for Whittier. Capt. Harold Merritt and Steve Hagedorn, guards and fullback, center, complete the line-up.

Down in Ye Friendly Towne is the probable 1928 Southern Conference champion. The Sagehens have even with Gandy Works's U. C. L. A. quintet last year and with the Bruins in faster company this season, look like a decent road team. The Foxes, despite the fact that Paul Willard, Weaver, Stockford, Huntfield and "Jerky" Jettberg are the stars of the Whittier team and they are an unusually good bunch, will be hard to beat.

Whittier's best players, John Johnson, the clever little boy from Santa Cruz, and Frank Dyer, a hard-working sophomore, have both shown good form and are improving daily this year. They will make things interesting for Whittier. Capt. Harold Merritt and Steve Hagedorn, guards and fullback, center, complete the line-up.

Basketball

BERKELEY, Jan. 14. (Exclusive)

That his system of instruction, which has been largely instrumental in bringing the University of California four consecutive Pacific Coast conference basketball championships, is not one overlaid with tricks and other not-to-be-named policies, is the statement made to Walter Burroughs in an interview published in the current issue of the American Boy.

* * *

Top outstanding points of the Price system are to make play of practice and to make the players as difficult as possible. The players learn to pass, shoot, grab, pivot and run in a series of short, sharp, rapid movements. Our plan is to have five signs, one for each player, and each player must know his sign. One is to be master of the fundamental, another to be master of the game as far as passing, shooting, etc., as well as in general. We do not permit the players to talk, but in his hands, he is a blank to his brother.

ATHLETIC COMEBACK

Rooms as Dangerous
States in
Holland

A. GOULD

As Sports Editor
—Of all the colorful features of 1928 none pack as much for the Olympic Games as Amsterdam.

The ancient Dutch streets will be the scene of the greatest concentration of athletic talent ever seen in one place.

Johnny Adams, the German-American, "Monsieur Olympia," will again dominate the games at the Olympics. They are being held in Amsterdam.

One of all the sports which make up the games is up to him.

He is the champion of the world.

He has taken over a

whole new world of ticket sales.

Germany will be back in

the games for the first time in 1928.

It is not that America has

any less been or promising to

make a more spectacular

show than it did in 1924.

But the combined forces

of the United States and

Finland will be strong.

It is not known exactly

what the size of the new

athletic generation is.

Germany will be back in

the games for the first time in 1928.

Yankees Accused of "Buying Pennants" After Purchase of Lary and Reese

AMERICAN LOOP SKIPPERS YOWL

New York Squad's Bankroll Too Much for Others

Lazzeri and Koenig Due to Stick at Regulars

Col. Ruppert Buys Pair for Future Yankees Use

BY JOHN P. GALLAGHER
"Vines" Staff Correspondent
CHICAGO, Jan. 14. (Exclusive)—A yowl, gentle reader, is a prolonged wailing cry. Its utterance denotes despair, distress and/or both. In the case of seven American League pilots, however, who have been yowling ever since the announcement that Col. Jacob Ruppert of the New York Yankees has attached Lyn Lary and Jimmy Reese of the Oakland club to his fold, it apparently indicates hopelessness, desperation, dependency, pessimism and several others.

They see no chance of ever heading the New York club if it can afford to buy star players for the current year. As any rate they bid fair to cause a mild upheaval in junior-league circles, which, Dame Rumor has it, may eventually come to fruition. Judge E. C. Landis, baseball's high commissioner, for settlement.

HAPPENED MANY TIMES
It has happened many times, American League followers who are disappointed because some other league players put out, that a major-league baseball club has paid a vast amount of money for a promising young man. The players buy, they say, with probably no exception it has been done because that major-league club was badly in need of help. The cables, cables do, however, involving two infield stars established a new precedent in paying a vast sum of money for a player who, but for the fact that the major-league club does not need and doesn't intend to use for another year.

It is tempting to call these baseball savants of a small club being so strong and so rich that it can outbid all rivals in need of the players and the present Yankee Indians will begin to slip up and the two youngsters will have developed sufficiently to take their places. Scouting and the monopoly is the phrase that is used.

The amount paid by Col. Ruppert for the two youngsters is said to be \$150,000 and \$165,000, which, if true, establishes another high mark in financial transactions between major and minor leagues. That this amount is nearly correct, seems to be fairly certain, for it is understood that other clubs, the Chicago White Sox and the Chicago Cubs, in particular had bid as high as \$160,000 for the pair.

WON'T PLAY IN 1928
Boston men hereabouts seem to think it is highly improbable that either Lary or Reese can step into a regular job with the Yankees even in 1928. One is a shortstop and one is a second baseman. They have been mentioned above and Lary is second. Both are young men, and it will be tough for anyone to replace either of them for four or five years, or perhaps more, to the point of being forced into the position of third base held by Joe Dugan, who has already begun to show up.

But even when the Yankees obtain these two, they are likely to keep them out on option somewhere for a year or maybe the limit of two years before putting them in the public show in New York.

To the New fans of course, regard Col. Ruppert's move as showing wisdom and foresight. While the colonel himself has said nothing yet, the fans answer thus: "He will be assailed by other American League owners for buying Lary and Reese when he already has such a marvelous team. It is he who can make depending upon whether those who sell him the regard baseball as a business or as a sport."

VOLKE'S NINE SEEKS INDOOR BALL GAMES

When Ralph Volke, who is one of the youngest and best trainers of scappers, isn't making Vince Dunfee and Eddie Lopata do the work he is looking for game for his class indoor ball team, which claims the city playground championship, he calls up the Custer All-Stars, the former city champs, 6 to 2, and the Custer Club 12 to 1. Volke pitched a no-hit game against the Volke All-Stars are requested to call Manager L. Roth at Tucker 3630, as Volke says his boys are hot and ready to go.

EX-GIANT BACKSTOP BOUGHT BY HARTFORD

TOLEDO, Jan. 14. (EP)—Stanford Embry, catcher with the New York Giants part of last season, was purchased outright tonight from the Hartford Club of the Eastern League by the New England American Association. The amount of cash involved was not announced.

THEVENOW RETURNING TO ST. LOUIS IN FINE SHAPE

ST. LOUIS, Jan. 14. (Exclusive)—The many admirers of Tommy Thevenow, the Cardinals' star shortstop, who have been awaiting the recovery of his injured ankle are glad to hear the injured member is as stout as it was when he used it as a sliding board here last season.

As part of the drive and his absence cost the Cards the pennant, many sharpies believe. This winter, according to word from Madison, Ind., Thevenow's home town, he is working out. In spite of stunts to prove his leg will be equal to the pennant strain this coming season.

MAJOR CIRCLES STILL BUZZ WITH HORNSBY TRADE DOPO

CHICAGO, Jan. 14. (Exclusive)—Major league circles are still merrily buzzing about the "Hornsby case." McGraw's trading the Rajah, who is recognized as one of the greatest baseball players in the national pastime today, for two men practically unknown to baseball "fans" quite.

"What is back of the deal?" is the question heard on all sides. The thoughts of the fans run along similar lines, and the discussion continues.

"McGraw is going to get the Gotham crowd to say he has brought Hornsby to bear may also influence the Boston crowd. That Hornsby was a big gambler on horse racing, was well known to the Bostonians," Moore said.

McGraw, however, has been a gambler on horse racing, was well known to the Bostonians.

"McGraw, always close to the result of his association with Stoenham, may have heard ramblings in the betting rings that Hornsby was a 'marked man.' It is no secret in the turf world that Hornsby has been a gambler on horse racing, was well known to the Bostonians.

The other story is that Hornsby himself became involved in a feud that is said to have started in the New York club and in a show down that occurred a few days ago, McGraw emerged victorious.

The business and personal differences between officials of the New York outfit are said to date back a number of years. One of the main points of contention was the name of the manager, with Secretary James Tierney. On the other side was McGraw and Treasurer Francis McNamee.

Stoenham, who has arisen over the fact that McGraw was anxious to become president of the Giants, and that Stoenham had in mind to make the veteran manager to a quiet berth, such as president of the Boston Braves.

One of the stories going the rounds of the circuit is that Rogers' dismissal from the New York club was brought about by New York's desire to have him as a top managerial ambitions was the cause of his unexpected trade, while still another story told by Freddie Lindstrom, Giant manager, is that Hornsby's action should follow at once, and one prominent member of the New York club has been here today.

"And," he added, "If Hornsby is again involved in another gambling case, he will have a perfect right to trade him to keep peace and harmony on his club.

But, regardless of what it is, the public should be let in on it. It may be that the reason is merely carryover matriarch but case takes care of itself.

The other story is that Hornsby let himself become involved in a feud that is said to have started in the New York club and in a show down that occurred a few days ago, McGraw emerged victorious.

The business and personal differences between officials of the New York outfit are said to date back a number of years. One of the main

points of contention was the name of the manager, with Secretary James Tierney. On the other side was McGraw and Treasurer Francis McNamee.

Stoenham, who has arisen over the fact that McGraw was anxious to become president of the Giants, and that Stoenham had in mind to make the veteran manager to a quiet berth, such as president of the Boston Braves.

PLANNED TO OUTST JAWN

Whether Stoenham informed Hornsby that so arrangements would be made to "pitch out" the rest of the season as a president of the Boston club before the season of 1928 opened is not known. The belief is that it was Stoenham's intention to show Clark, of the Angels Club for the singles medal by a score of 26 to 12. Miller and his partner G. H. McKinney won the doublets from Gallagh and McDonald of the Angels Club.

The Los Angeles Club captured the ring games from a Pasadena squad.

NOT SLIPPING

In the year that Hornsby played as a member of the Giants, he showed not the slightest sign of slipping.

It is not better, McGraw, one of the shrewdest men in baseball is not in the habit of giving away first-class material for two men who have been in the game for a number of years and who may or may not develop into first-class players. The affair, therefore, calls for a more thorough explanation than has been given out of the office.

The gambling story which has been printed in the East is to the effect that the recent court decision that Hornsby need not pay a gambling debt of \$94,000 to the New York City Criminal betting commissioner who also has offices in New York, caused so much pressure to be brought to bear on President Clark, G. H. McKinney and M. C. McNamee that the ax was applied to the former pilot of the Cardinals.

There is a code among professional gamblers which is: "Doom's to the Volke All-Stars are requested to call Manager L. Roth at Tucker 3630, as Volke says his boys are hot and ready to go."

CISSELL HOPE OF WHITE SOX

Comiskey Paid \$123,000 for Beaver Shortstop

Chicago Club Has Paid Out Plenty for Stars

Schalk Plans to Shift Berg to Receiving Job

This is the second in a series of articles of Major League Baseball clubs.

CHICAGO, Jan. 14. (EP)—One, by one, at prices which set records in major-league baseball sales, the Chicago White Sox have been acquiring high priced youngsters to rebuild the team wrecked in 1926. And if those acquired in recent years last until all the positions are filled, the Sox eventually will have a club to be reckoned with in the American League.

Half a million dollars has been laid out by

Owner Charles A. Comiskey in repairing the damage wrought by the Black Sox scandal of 1919-20.

Topnotch youngsters are so scarce and so difficult to obtain that untried hopefuls appear in the box lineup.

For places unfilled by expensive youngsters, Comiskey has been forced to fall back on the best of the oldtimers.

CISSELL BIG PURCHASE

The winner's big deal for the Sox was the purchase of Chaisell for \$123,000, a record price.

At shortstop he will be

along side a \$100,000 purchase of a few years ago.

For the year 1927, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1928, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1929, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1930, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1931, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1932, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1933, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1934, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1935, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1936, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1937, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1938, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1939, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1940, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1941, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1942, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1943, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1944, Comiskey

has signed a \$100,000 contract

with Bill Schalk.

For the year 1945, Comiskey

has signed a \$100,000

Southland Tennis Stars Open Los Angeles City Net Tournament at Griffith Park Today

THEY SPECIALIZE IN TOSSING THE CASABA

Here are four reasons why the University of California's Los Angeles basketball team hopes to finish high in the Pacific Coast Conference next season. From left to right: Capt. Jack Ketchum, one of the outstanding forwards on the Coast, is playing his last year of basketball; Bill Woodrooff in the center is a junior and first-string center. He promises to be a big help to the Bruins next year. Larry Wilde is only a sophomore, but promises to rival Ketchum as a forward. Coach Caddy Works is the real reason for the phenomenal success the Bruins have had in Southern Conference competition and he has hopes of making a name for himself in the big leagues. Coach Works played basketball at the University of California, where he was considerable fame as a basketball and baseball star.

Bowling Notes

Lewis, who now resides in Pa., recently won a championship of Pennsylvania.

Apple of Rock Island was held at Weyan, June 12. The tournament was held in the rotunda style. This was the first time Chicago had ever been in the championships. There was a very large entry from the Duxbury won third place.

J. Harrison of Pittsburgh, Pa., was elected president of the American Bowling Congress. The new office will be located in New York City. The new president will take office April 24 and continue until May 27 inclusive.

Don't forget that the California tourney starts in five days. You have done your part in trying to make it a success. It is the only association sport. Association dues per year but if enough we can afford to pay our dues. The next State meet is in outline the annual bowling tournament ever staged in the United States.
